The Aquarium is a great place to practice your 1-2-3s! Animals have different numbers of body parts – some have 1 foot, some have 2 eyes, some have 5 arms, some have 8 legs, and more. The goal of the game is to find an Aquarium animal with body parts for each number from 1 to 10. You can count fins, feet, gills, eyes, spots or anything. (1 tail, head, mouth, spine, or... and 2 eyes, flippers, ears, legs, or...).

Share the name of the animal and its body part, such as:

Example:

A sea otter has 1 tail.
